GENEALOGY and CLOUD COMPUTING

Presented by
Randy Seaver

Can we do all of our genealogy research, data organization, analysis, collaboration, and writing online – in the “cloud” on remote servers and computers rather than on our desktop or laptop computers? What about using smart phones and tablets for genealogy? This talk will discuss the elements of cloud computing, including mobile devices, and their application to genealogy tasks, along with an evaluation of the benefits and drawbacks for these exciting new and pervasive technologies.

About the Speaker: Randy Seaver is a native of San Diego, a graduate of San Diego State University, and a retired aerospace engineer. His ancestry is mainly colonial New England and Upper Atlantic, with some colonial German, French and Dutch forebears, and several 19th-century English immigrants. He has been pursuing his elusive ancestors since 1988, and has been online since 1992. Randy is a former President of the Chula Vista Genealogical Society, and is currently the Newsletter Editor and Research Chair. He speaks to Southern California societies, libraries and groups, and teaches "Beginning Computer Genealogy" adult classes at OASIS. He is a member of NGS, NEHGS, SCGS, SDGS, CGSSD and CVGS. Randy blogs daily about genealogy subjects at Genea-Musings (www.geneamusings.com) and the Chula Vista Genealogy Cafe (<http://cvgencafe.blogspot.com/>).

PLEASE JOIN US FOR THIS INFORMATIVE PROGRAM, AND ENJOY COMPLIMENTARY REFRESHMENTS WITH OUR MEMBERS.

Meeting Place:
Corner of Hillcrest Drive and Marguerite Parkway,
Mission Viejo Family History Center main building
Time: 10 a.m. to 12 p.m.

Visitors Welcome!
