Crawford County Farm Directory

Announcement

This publication, a copy of which is to be given to each active farmer in the county is made possible by the firms which advertised in it. These firms will welcome the opportunity to serve you and will appreciate having you tell them you saw their advertisement in this publication.

The information contained herein is as nearly correct in every detail as could be obtained from the records of the county, from information supplied by county assessors and other sources. There may be a few errors, but they are few and, we believe, of no material importance.

As important as any other part of the directory are the numerous advertisements to be found therein. The advertisements tell where you can buy the needs of the farm and home, from reliable dealers.

THE CRAWFORD COUNTY FARM BUREAU

The Crawford County Farm Bureau was organized in 1918 as the Crawford-Jasper Farm Bureau. Its offices are located at 103 W. Walnut Street, Robinson, Illinois. It will soon complete 29 years of interesting service to the surrounding community.

The Crawford County Farm Bureau is an organization of farm folks grouped together for their mutual benefit. In its work it represents the College of Agriculture of the University of Illinois and the United States Department of Agriculture, Washington, D. C., as well as the farm group known as the Farm Bureau, which is composed of local farmers.

The object of the Farm Bureau is to maintain the well being of agriculture as an industry, economically, educationally and socially. The membership of the Farm Bureau consists of farmers living on the land and others who are directly or indirectly interested in maintaining the agricultural program. The organization is supported by an annual membership fee of \$15.00, \$10.00 of which goes to the county \$4.50 to the Illinois Agricultural Association and 50 cents to the American Farm Bureau Federation.

The Farm Bureau in its strictest sense is an agricultural service organization with an ideal to make the business of farming more profitable and serviceable, to make farm homes comfortable and attractive and communities the most desirable places in which to live and rear a family. To this end it cooperates with local Grange units, of which there are 5 in the county. With this strong background the

Farm Bureau is accomplishing much for all the farm people and agricultural communities alike in its program of co-operative marketing and distribution of farm products, a program which is included in its activities in addition to the broad educational program as outlined above.

The Farm Bureau is the medium of exchange through which the educational program of the State University and the United States Department of Agriculture is disseminated and put into practical use on farms. This is accomplished, not only through lectures and educational meetings, but through actual demonstrations on farms.

The Farm Bureau is absolutely non-political and is governed by a non-partisan board of directors, consisting of one man from each township, elected by the membership at large.

All the services rendered through the organization, including membership accounts and supply company service, have their accounts audited annually by the Illinois Agricultural Auditing Association, which is one of the highest authoritative cooperative auditing services available.

The Crawford County Farm Bureau, is of course a unit of the State-wide Illinois Agricultural Association, which is the largest organization of farmers in the State of Illinois, having a membership of 133,971 throughout the 102 counties of the state. All of the state members are included in the membership of the American Farm Bureau Federation, with over 1,000,000 farmers, which is the largest and most aggressive farm organization in the world.

Meet Your Friends at

Robinson's Largest and Most Complete Department Store

It is the national organization representing all state farm bureaus, of which the Illinois Agricultural Association is a state unit.

4-H CLUB WORK

One of the strong educational projects carried on by the Farm Bureau is that of 4-H Club work, of which there are approximately 400 members. Club members are always interested in learning about the 4-H Club emblem, a four-leaf clover with the letter "H" in each leaf, denoting the 4-H development of heart head hands and health. 4-H Club members have a pledge of which they are very proud, as follows:

I Pledge:

- my HEAD to clearer thinking
- my HEART to greater loyalty
- my HAND to greater service
- my HEALTH to better living

For my club, my community, and my country.

The clubs also have a motto, which is "To Make the Best Better." The all-round purpose of 4-H Club work is to aid in the proper growth and development of farm boys and girls. During the war great emphasis was placed on the type of work that further the war effort. Members are encouraged to select projects of sufficient size to permit efficient use of their time and facilities. The clubs carry on regular monthly meetings of an educational character, in which the various projects are featured. Each club maintains its own officers, consisting of president, vice president, secretary-treasurer, reporter and recreation chairman. Well planned recreational activities are a part of 4-H Club work. It gives the young people an opportunity to relax and play together.

THE HYBRID AGE

Today is the age of hybrids. It is an era in which plant breeders, seed producers and farmers work together as one for increased profits. Out of studies conducted by specialists of the experiment stations of the colleges of agriculture, and the United States Department of Agriculture, has developed a new science to live through hybridization.

BETTER FARM MANAGEMENT

This project is being carried forward with a view to organizing the average farm business for maximum profit by—

- a. Making use of current outlook and marketing information presented at community meetings and over the radio, as well as through the press.
- b. Determining from study the weak points in the farm business with a view to their correction.
- c. Increasing the volume of business through increased output per man and machine.
- d. Increasing crop yields.
- f. The establishment and maintenance of sound land use programs and a well balanced farm business.
- g. Reviewing the usual exchange of farm expenses and income between landlord and tenant with a view to the establishment of more equitable relations therein.
- h. Improving farm returns by improved efficiency in marketing and buying agencies.

Here's how the DIAMOND GAS LPG System
SUPPLIES ALL THE GAS YOU NEED
for Your Modern Farm, Ranch or Suburban Home

A Diamond Gas System starts paying for itself from the moment it is installed and provides these distinct and desirable advantages:

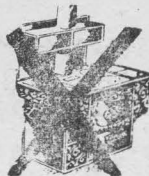

**More Dependable
Refrigeration**

**Automatic
Hot Water**

**Easier
Heating**

**Better
Cooking**

HEATH DAIRY PRODUCTS BUILDING

We are Pleased...

To be a Part of a Fast-growing Dairy Industry in Crawford County.

During the past few years we have equipped our dairy plant with the most advanced and most modern equipment to be found anywhere in the nation. In our plant we are able to process milk products in any form—cheddar cheese, bottled milk, processed cheese, ice cream, condensed milk, condensed whey and butter.

Last Year Our Plant...

1. Processed approximately 14,000,000 pounds of milk furnished by 600 producers in this area. This provided farmers an annual income for their milk of \$650,000.00.
2. Manufactured 750,000 pounds of cheddar cheese which was distributed in the form of process cheese throughout Illinois and Indiana.
3. Used 2,000,000 pounds of butter in the manufacture of our candy bar, which provided a large market for cream in this part of the state.

—::—
We are equipped to handle a large volume of milk and offer one of the best markets in the state.

Dairying in this county has become a major industry and we are proud to have had a leading part in its growth.

ANTIDOTES FOR POISONS

First—Send for a physician. **Second**—Induce vomiting by tickling the throat with feather or finger; drinking hot water or strong mustard water. Swallow sweet oil or whites of eggs. Acids are antidotes for Alkalies, and vice-versa.

Acids. Muratic, Oxalic, Acetic, Sulphuric (Oil of Vitriol), Nitric (Aqua Fortis). Antidote—Soap suds, magnesia, lime-water.

Prussic Acid. Antidote—Ammonia in water. Dash water in face.

Carbolic Acid. Antidote—Flour and water. Mucilaginous drinks.

Alkalies. Potash, Lye, Hartshorn, Ammonia. Antidote—Vinegar or lemon juice in water.

Arsenic. Rat Poison, Paris Green. Antidote—Milk, raw egg, sweet oil, lime-water, flour and water.

Bug Poison. Lead, Saltpetre, Corrosive Sublimate, Sugar of lead, Blue Vitriol. Antidote—Whites of eggs, or milk in large doses.

Chloroform. Chloral, Ether. Antidote—Dash cold water on head and chest.

Iodine. Antimony, Tartar Emetic. Antidote—Starch and water, astringent infusions, strong tea.

Mercury—and its Salts. Antidote—Whites of eggs, milks, mucilages.

Opium. Morphine, Laudanum, Paregoric, Soothing Powders or Syrops. Antidote—Strong coffee, hot bath. Keep awake and moving at any cost.

To Measure Corn In Cribs

Corn in the ear of good quality, measured when settled, will hold out at 2½ cubic feet to the bushel. Inferior quality, 2% to 2½ cubic feet.

Rule—At 2¼ cubic feet to the bushel, divide the cubic feet in crib by 2¼, or multiply by 4 and divide by 9.

At 2% cubic feet to the bushel, divide the cubic feet in crib by 2%, or multiply by 8 and divide by 19.

At 2½ cubic feet to the bushel, divide the cubic feet in crib by 2½, or multiply by 2 and divide by 5.

ONE MAN ALONE

Equal to his task on a corn plow—largely the master of his own destiny as a producer—but no match for the big problems arising beyond his line fences is ONE MAN ALONE.
