The pump at well was rebuilt. New pipe from outlet to bottom of well. Valves not replaced. Very good. There is 30 feet of pipe from top to bottom of well. From base of pump to top of platform about 5 feet. The well is about 43 feet deep, about 12 feet from top of well to water line or 31 feet water at a fairly dry time and about 8 feet of water in the well below strainer at bottom of pipe.
