This file is available in Word Perfect 6.0 format by email from the author. This file is Kelley.wpd.

Dates are shown as month-day-year!

I dedicate this file to Carl, Henry, Tom Harold and Barbara Kelley, children of CW Kelley and Ida Jewell Cochran Kelley, who were raised in Cherokee County, GA and went to school with this author.

Approximately 21 pages.

A special thanks to John Carver for his data on this family.

## Introduction

The material presented here is a working copy of my data at this time. Page numbers change when material is added so any specific reference to page numbers has not been completed at this time. Some material contained herein is repeated as it comes from various sources and it needs to be combined but in some cases conflicts in data are obvious. Also all data are to taken with a "bag of salt" and are subject to verification and correction. I have tried to document the source of the information and if possible another reference to document the data.

The file is meant to be both a documentation of my family and a place to store data on those with the same name who may or may not be related.

I have attempted to document each piece of information with at least one superscript ie source. These represent the source(s) used and they are identified in a separate reference file.

No index is available at this time either but the search routine of Word Perfect or a modern word processor makes it unnecessary until final page numbers can be assigned.
