Editor's note: Thanks to all who contributed to the publication of this book. Those who copied the records deserve special thanks because of the difficulty of reading the writing.

An extra-special note of thanks goes to Rebecca Buxton, who copied the records from 1906 to 1915 which made up more than half the marriages in the book.

Located in the Florida Panhandle, Walton County was created in 1824 from Jackson County. However, the courthouse burned in 1885, so records before then do not exist. In 1915 Okaloosa County was formed from Santa Rosa and Walton Counties. Thus, records in this book also include persons from the eastern half of what is now Okaloosa County.

## INTRODUCTION

Members of the Genealogical Society of Okaloosa County began copying Walton County marriage records in the 1970s for inclusion in their Journal. This volume compiles those and adds records through 1915. The editor has proofread all of them from the original to help eliminate errors. However, the writing is often difficult to read and spelling is poor. Copier Rebecca Buxton described the spelling as "phonetic and inventive."

Names that end with a vowel frequently have an "r" added. Thus, "Lela" becomes "Lelar," "Emma" becomes "Emmer" and "Neter" is probably "Nita." "Burnes" and "Birnes" are probably "Bernice."

Lower case "n" is easily confused with "r" and "u." Upper case "R" and "B" are sometimes difficult to distinguish between as are upper case "S" and "L."

Often vowels are omitted. Examples : Mllie (Mollie? Millie?) or Jsiah (Josiah?). Letters are sometimes reversed: Loius (Louis?). The careful searcher will think of the ways a name could be spelled phonetically.

Occasionally a name is spelled one way on the license and another on the recording section or in the index. In this volume, we have shown both spellings with one in parentheses, for instance, Thomson (Thompson). When a name was very difficult to decipher, we show it by placing a question mark after it. When there is a question between two spellings, the second one in parentheses has a question mark after it, i.e., Thomson (Thompson?).

There are several instances of a record having no marriage date. Since it was recorded, the marriage must have taken place and we estimate it as being between the license date and the recording date. Occasionally, a license is filled out but no marriage is recorded. The marriage may have taken place, the minister failing to record it, or the couple may have reconsidered.

If the searcher finds a name similar to the one being sought, it would be wise to obtain a copy of the license. Other information to be found on the original includes the following: date of the license, the name and title of the person performing the ceremony, the county clerk's name, the recording date and in later years the names of witnesses.

A copy may be obtained from Clerk of Court, Walton County Courthouse, DeFuniak Springs, FL 32433. At the time of this printing the cost of the copy is one dollar along with a self-addressed stamped envelope.

Index begins on page 92.
