

Doley, David, Dr (from Centre for Mined Land Rehabilitation, University of Queensland website)

Student from W.A. Graduated from Australian Forestry School 1960. Won the Schlich Medal as top student. David taught in the Department of Botany, University of Queensland, for thirty years before taking up an honorary advisory position with Centre for Mined Land Rehabilitation.

David is interested in the application of plant ecophysiology to the understanding and solution of problems in the minerals industry environment. These include vegetation establishment, plant water relations, the effects of atmospheric pollutants on plants and the monitoring of vegetation condition.
