

Ho, Amy (from The Forester June 2003)

ANU forestry graduands 2002

Eleven graduates in forestry, or associated joint degrees, and nine postgraduates who completed their courses in 2003 accepted their degrees at ANU's May 2003 conferring ceremony. As is typical for most graduate forestry classes, almost all graduands have already secured relevant employment — in this year's case, at locations as close as North Canberra and as distant as Bunbury. Amongst the graduands was Philip Alcorn, who was awarded a University Medal in Forestry. At an associated ceremony at ANU Forestry, Philip and Amy Ho were presented with Schlich Medals for Forestry, honouring the outstanding BSc (Forestry) forestry graduate in 2001 and 2002, respectively.

Amy Ho,
Prof Peter Kanowski
and Philip Alcorn

forests, southern tablelands, New South Wales

Tristram Miller — Interpretation and reconstruction of a disturbed inverted treeline at Long Plain in Kosciusko National Park, New South Wales

Radhika Murti — Effects of environmental factors on rooting of mini-cuttings of selected eucalypt hybrids

Michael Nguyen — The effects of the fire on hydrological processes in the upper Cotter River Catchment, ACT

Amber Pares — Soil organic carbon sequestration in mixed and monospecific plantations of *Eucalyptus globulus* ssp. *pseudoglobulus* and *Acacia mearnsii*

Samantha Titheridge — Tree crown dieback of *Fraxinus oxycarpa* cv Raywood in Canberra's urban forest

Cressida Wilson — Remnant woodland condition and its influence on woodland bird species richness and community composition

ANU forestry graduands 2002

Eleven graduates in forestry, or associated joint degrees, and nine postgraduates who completed their courses in 2003 accepted their degrees at ANU's May 2003 conferring ceremony

As is typical for most graduate forestry classes, almost all graduands have already secured relevant employment — in this year's case, at locations as close as North Canberra and as distant as Bunbury

Amongst the graduands was Philip Alcorn, who was awarded a University Medal in Forestry

At an associated ceremony at ANU Forestry, Philip and Amy Ho were presented with Schlich Medals for Forestry, honouring the outstanding BSc (Forestry) forestry graduate in 2001 and 2002, respectively

Eleven ANU students completed Honours in forestry-related topics in November 2002; their thesis titles are listed below:
Philip Alcorn —

The effect of light availability, canopy gap size and within gap position on the growth of *Eucalyptus obliqua* seedlings.

Amy Ho

— Particulate pollution capture and retention by *Eucalyptus elata* Denhn. in the ACT
