

Penbrook, Aldo (from LinkedIn)

Education

The Australian National University Bachelor of Science (B.Sc.), Forest Sciences and Biology 1973 – 1977.

University of Melbourne postgraduate diploma, education 1997 – 1998.

Experience

Consultant Independent contractor 2004 – . Bendigo, Victoria. Bendigo landscapes have undergone major changes over the last 160 years due to the impacts of human settlement. My area of specialisation focusses on the response of communities - flora, fauna & human - to landscape changes over time. From an understanding of the past, recommendations can be developed as to how to enhance connectivity over time & space. Improved connectivity benefits the co-existing communities of a landscape by enhancing their resilience to future landscape change, in particular climate change.

Project Manager PepperGreen Community Enterprise 2004 –2005 Bendigo. Managed several community operated enterprises & environmental sustainability education programs.

Volunteer City of Greater Bendigo Natural Reserves 2004 – 2013.

Landscape Management Auditor Thiess Services 2006 –2012 Central Victoria. Auditing of landscape works (earthworks, plantings & weed control) along a section of the newly built Calder Freeway

Field worker North Central Catchment Management Authority 2012 –2012 Bendigo. Survey Bendigo Creek for Alligator Weed infestations.
