In the fall of 1943, 10 CFC Companies came back to Canada. They were starting to run out of timber in Scotland. It was also thought that it would be better to use this manpower to cut timber in Canada and ship it over as necessary, also some of the soldiers would form up into fuelwood cutting units in Canada which was very much in demand. Some of the soldiers also transferred to the fighting units and went back to England. Some of the soldiers were discharged as well.
