In a file cabinet on the west side of Fort Worth, records of the Society hide from the dust bunnies. Among these files is an old ledger that contains some of our earliest membership records. It seems fitting that the Society's history should be spotlighted in observance of our 50th anniversary in 2007.

The title used on this ledger originally read *Records of FWGS by - Fort Worth Geneal. Soc. and Texas State Genealogical Society*. The name of the State Society was later marked out.

In the beginning, only the odd numbered pages were put to use. When there was no more space, the writer began putting the facing pages into service, but not from front to back. The doubling up started opposite the last page and proceeded forward until the book was filled. It is apparent that the book began its life in 1961. On the cover page is written the date March 1, 1961, and the first group of entries is an alphabetical listing of members dating from organization through the mid-1960's. Members were recorded here into early 1982. It is important to keep in mind that these were not the only membership records being used at the time and the membership dates represented here represent only a portion of the span of membership for many members. For example: Albert Eason Baze was a member through 1995. It will require study of other records to determine if his membership was continuous for these thirty-nine years.

The information presented here omits street addresses, zip codes and telephone numbers for privacy, and membership dates have been reduced to only the year. It is assumed that the member lived in Fort Worth when the book does not state otherwise. My comments are framed in [brackets.]
